Letter of recommendation
For Dávid Horov

I hope this letter finds you well. As we prioritize continuous feedback at Tesla to recognize, improve, and refine our work, I wanted to share my feedback about David, with whom I've been collaborating on the SkidManager project over the past few months.

David has consistently demonstrated a remarkable attention to detail, tackling a high volume of tickets and tasks with precision and care. His dedication to delivering high-quality results has been impressive, and his ability to balance multiple priorities has been instrumental in keeping our projects on track. Whether it's addressing complex UI issues or implementing new features, David has shown a keen eye for details and a strong commitment to excellence.

One example that stands out in my mind is his work on the deprecation of AntD in favor of TDS. David took ownership of this complex task, carefully planning and executing the migration to ensure a seamless transition. His meticulous approach and attention to details were essential in avoiding any disruptions to our users, and his solution has been praised by the team and stakeholders alike.

What's more, David has been an invaluable resource for our team, always willing to lend a hand when needed. His positive attitude and collaborative spirit have made him a pleasure to work with, and his contributions have had a significant impact on the overall quality of our frontend development work, as mentioned by many of our users and customers.

I wish David continued success in his future endeavors and hope to have the opportunity to work with him again in the future.

Thank you,
